Key Information Document production date: 15/12/2023

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

What is this Product?

Type

The Product is a sub-fund of a French SICAV mutual fund, which is UCITS governed by European Directive 2009/65/EC.

Term

This Key Information Document describes a sub-fund of the French SICAV mutual fund, EdR SICAV. The prospectus of the EdR SICAV mutual fund, as well as the relevant semi-annual reports, are established for all of the sub-funds in the SICAV fund. The term of the Product is 99 years. This Product has no maturity date. The Management Company reserves the right to dissolve the Product unilaterally. The Product may also be dissolved in the event of a merger, a total redemption of shares, or if the Product's net assets fall below than the regulatory minimum amount. The assets and liabilities of the various sub-funds are segregated. As such, any shares you hold in this sub-fund may not be exchanged for shares in another sub-fund in the EdR SICAV mutual fund.

Objectives

The Product's investment objective, over the duration of the recommended investment period, is to outperform its benchmark, the MSCI EMU index, by investing in eurozone companies, combining financial profitability with the implementation of a policy that aims to respect non-financial criteria. The Product's investment strategy also takes climate issues into account and aims to align the portfolio's climate trajectory with the Paris Agreement. The Product is managed actively, which means that the Manager makes investment decisions in line with the Product's investment policy with a view to achieving the Product's objectives. This active-management process entails taking decisions regarding the selection of assets, regional allocations, sectoral views and overall market exposure. The Manager is in no way limited by the composition of the benchmark index in the positioning of the portfolio, and the Product may not hold all the components of the benchmark index, or even any of the components in question at all. Deviation from the benchmark index may be total or significant but, occasionally, may also be minor.

Benchmark index: MSCI EMU (NR), net dividends reinvested

Investment policy: The Product implements an active stock-picking management strategy, selecting listed stocks from an investment scope comprising mainly eurozone securities. At least 75% of the Product will be permanently invested in equities and other PEA-eligible securities and at least 60% will be exposed to shares issued in one or more countries of the eurozone. Up to 110% of the Product's net assets may be exposed to equity risk. The ESG investment universe is composed of all companies in the Product's benchmark index, the MSCI EMU, as well as listed small and mid-cap companies in the eurozone worth up to €5 billion and not belonging to this index. The Product will also be able to invest up to 10% of its assets in listed large-capitalisation companies worth over €5 billion outside the eurozone. The management company may select securities from outside this ESG universe. However, it will ensure that the chosen ESG universe offers a relevant comparison for the Product's ESG rating.

Securities are selected based on the combined use of financial criteria to identify the securities with significant growth prospects and non-financial criteria in order to meet the requirements with regard to Socially Responsible Investment.

This analysis is designed to allow securities to be selected based on the Management Company's own ESG rating grid, which classifies securities according to the environment, social-societal, and governance criteria listed below: Environment: energy consumption, greenhouse gas emissions, water, waste, pollution, environmental management strategy, green impact;

Social: quality of employment, human resources management, social impact, health and safety;

Governance: structure of governance bodies, remuneration policy, audit and internal control, shareholders.

The SRI ratings model was formulated:

- using a Best-in-Universe approach, i.e. by favouring the best-performing companies regardless of their financial rating, size or sector.

- using differentiated weightings of the three ESG pillars for each sector depending on its specific challenges:

as a result, the three non-financial pillars are allocated a greater or lesser weighting depending on the sector in question, which puts a different emphasis on each of the three pillars.

For example, a chemical company will be more affected by environmental issues whereas, for a company in the business services sector, a greater weighting will be placed on social factors. To determine if the company analysed embodies the characteristics of a responsible and sustainable company as defined by the Management Company, the latter carries out research to produce an internal ESG rating on a scale of 7 ranging from AAA to CCC. This rating is an aggregation of the results scored against the various ESG criteria in the rating grid determined by the analysts. The securities included in the portfolio will have a rating greater than or equal to A according to the Management Company's internal rating. A climate profile analysis of the company is also being carried out. As part of its climate objective, we aim for this Product to have a climate trajectory of less than 2°C as defined in the 2015 Paris Agreement. Based on the manager's expectations of changes on the equity markets, the Product may invest up to 25% of its net assets in debt securities and money market instruments traded on eurozone markets. These stocks (which are rated at least Investment Grade, but with no maximum duration) are selected according to their expected yield. Subject to a limit of 100% of the assets, the Product may invest in financial contracts traded on regulated, organised or OTC markets.

Furthermore, the Product may invest up to a global limit of 10% of its net assets in UCI units or shares. The Product may hold securities not denominated in euros, and may therefore be exposed to currency risk. For hedging purposes, the Product may use forward currency contracts or currency swaps. The Product may also subscribe to equity options, for both hedging and exposure purposes, and to futures to manage exposure to equities. Exposure to currency risk through currencies other than those of the eurozone is limited to a maximum of 10% of the net assets.

AMF classification: Equities of Eurozone countries

This Product is eligible for the French PEA equity savings plan.

Allocation of income: Accumulation

Allocation of net realised gains: Accumulation

Intended retail investors

A EUR shares: All subscribers, provided they are willing to accept the risk of capital loss.

This Product may not be purchased by or benefit, either directly or indirectly, natural or legal persons residing or domiciled in the United States, citizens of the United States, or United States Persons.

Practical information

Custodian: Edmond de Rothschild (France)

You can request the redemption of your shares on any day of the week, except on public holidays and on the days on which French markets are closed (see the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12:30 pm on the day before the net-asset valuation day.

The Product's prospectus, its latest annual report, and any subsequent interim reports (in French, and in English, if required) will be provided free of charge upon written request to Edmond de Rothschild Asset Management (France) 47, rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France; telephone: +33 140 172 525; email: contact-am-fr@edr.com.

Share prices and, where necessary, information on other share classes, as well as information on the Product's net asset value, performance scenarios and past performance, can be found on www.edmond-de-rothschild.com.

What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

← Lower risk Higher risk →

The summary risk indicator assumes that you will hold the Product until the maturity date of the recommended holding period (5 years). The actual risk can vary significantly if you opt to exit before the maturity date, and you may get back less.

The summary risk indicator is provided as a guide to the level of risk of this Product compared to other products. It shows how likely it is that this Product will incur losses due to market fluctuations, or our inability to pay you.

We have assigned this Product a risk rating of 4 out of 7, which means that it is a medium-risk product. In other words, the potential losses on the Product's future performance are in the medium range and, if market conditions were to deteriorate, our ability to pay you may be affected.

Moreover, you will also be exposed to the following risks (not shown in the summary risk indicator):

Credit risk: The risk that an issuer of debt or money market securities cannot meet its obligations, or that its credit rating is downgraded. It also refers to the risk that an issuer defaults on repayment at maturity.

Liquidity risk: The risk arising from low levels of liquidity in underlying markets, such that they are more sensitive to significant buying/selling trends.

Derivative risk: The use of derivatives may result in a more significant decline in the Product's net asset value than that in the markets where investments are made.

Counterparty risk: This is the risk that a market participant defaults, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value.

As this Product does not include any protection against future market performance, you could end up losing some or all of your investment.

Pay particular attention to currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which the Product is marketed, the final return will depend on the rate of exchange between the two currencies. This risk is not taken into account in the indicator shown above.

Performance Scenarios

The figures shown include all the costs in connection with the Product itself, but may not include all of the costs that you may be required to pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Future market trends are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the Product's and/or the relevant the benchmark index's worst, average, and best performance over the last 10 years.

Markets could trend very differently in the future.

The stress scenario shows what you might get back in extreme market conditions.

With an investment of EUR 10,000

Recommended holding period: 5 years		If you exit after 1 year	If you exit after 5 years (i.e. the recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you could get back after costs are deducted	EUR 1,730	EUR 1,960
	Average annual return	-82.7%	-27.8%
Unfavourable	What you could get back after costs are deducted	EUR 8,100	EUR 9,220
	Average annual return	-19.0%	-1.6%
Moderate	What you could get back after costs are deducted	EUR 10,180	EUR 12,560
	Average annual return	1.8%	4.7%
Favourable	What you could get back after costs are deducted	EUR 13,400	EUR 15,840
	Average annual return	34.0%	9.6%

This table shows different scenarios illustrating the amounts that you could get back over the recommended holding period of 5 years, assuming you invest EUR 10,000.

Unfavourable scenario: This scenario occurred for an investment made between December 2017 and December 2022.

Moderate scenario: This scenario occurred for an investment made between February 2016 and February 2021.

Favourable scenario: This scenario occurred for an investment made between September 2013 and August 2018.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Product is a separate co-ownership comprising financial instruments and deposits held by the portfolio management company. Should the latter become insolvent, the Product's assets that are held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs financial losses will be mitigated due to the legal requirement for the custodian's asset to be held separately from those of the Product.

Investments in the Product are not themselves hedged or guaranteed by a national compensation mechanism. The resale of the Product's shares, and the Product's capital and income, are not guaranteed by the Product manufacturer.

How much will this investment cost me?

The person who is selling you this Product, or advising you about this Product, may charge you additional costs. If so, this person will provide you with information about these costs and how they will affect your investment over time.

Costs over time

The tables show the amounts that are deducted from your investment to cover different types of costs. These amounts depend on how much you invest, and on how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount you invested (0% annual return). For the other holding periods, the Product is expected to perform as shown in the moderate scenario.
- The investment is EUR 10,000.

With an investment of EUR 10,000	If you exit after 1 year	If you exit after 5 years (i.e. the recommended holding period)
Total costs	EUR 574	EUR 2,121
Annual impact of costs *	5.7%	3.5%

(* This illustrates the extent to which the costs will reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is projected to be 8.19% before costs, and 4.66% after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. If this is the case, they will inform you of the amount.

Composition of costs

With an investment of EUR 10,000 and an annual cost if you exit after 1 year.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay upon subscribing to the Product.	EUR 300
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	EUR 0
Ongoing costs (deducted each year)		
Management fees and other administrative or operating costs	2.05% of the value of your investment per year. This percentage is determined based on the actual costs incurred in the previous year.	EUR 205
Transaction costs	0.37% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the Product's underlying investments. The actual amount will vary depending on how much we buy and sell.	EUR 37
Incidental costs deducted under specific conditions		
Performance fees (and carried interest)	0.32%, performance fee deducted in respect of the previous financial year. Description: 15% per year of the outperformance compared to the benchmark index, the MSCI EMU (NR) index. If a share in the Product outperforms its benchmark index – and even if the share's performance is negative – a performance fee may be deducted during the reference period.	EUR 32

The table above shows the annual impact of the different types of costs on the return you could obtain on your investment at the end of the recommended investment period.

The costs shown here do not include any additional costs that may be charged by your distributor or advisor, or any costs in connection with a package that the Product may be part of. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the contract fees.

This table also explains what the different cost categories mean.

How long should I hold the Product, and can I take money out early?

Recommended holding period: 5 years

This Product is designed for medium-term investments. You should be prepared to hold your investment in the Product for at least 5 years. However, you may request the redemption of your investment at any time during this period – there will be no penalty for doing so. You may also hold your investment for longer than the recommended holding period.

Daily, with the exception of public holidays and days on which the French markets are closed (according to the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12:30 pm on each net-asset valuation day.

A redemption cap mechanism (known as "gating") may be implemented by the Management Company. The way this works is described in the SICAV's Prospectus and Articles of Association.

How can I complain?

If you wish to make a complaint regarding the Product, the Product manufacturer or the person distributing or advising you about the Product, with a view to having a right recognised or a damage remedied, please send us a written request, describing the problem and the details of the complaint, by post or e-mail, to:

Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France.

E-mail: contact-am-fr@edr.com

Website: www.edmond-de-rothschild.com.
